**Gas Transmission Operator GAZ-SYSTEM S.A.
02-337 Warszawa, ul. Mszczonowska 4**

APPLICATION¹

for the definition of the conditions of connection to a transmission network managed by Gas Transmission Operator GAZ-SYSTEM S.A. ("TSO") for a Group C entity possessing a liquefied natural gas facility.

1. We hereby apply for the connection to the transmission network managed by the Gas Transmission Operator GAZ-SYSTEM S.A. for the following facility:

.....
(name - type)

located in:

.....
(address)

from which we plan to supply gaseous fuel to the TSO's transmission system.

2. Selected from the catalogue of system points posted on the TSO's website: www.gaz-system.pl
a) physical exit point from the TSO's transmission system at which gaseous fuel will be off-taken from installation:

3. The expected starting date for the delivery of gaseous fuel to the TSO's transmission system:
.....

¹ The application shall be filled out in accordance with the instruction for completing the application located on the Company's website at www.gaz-system.pl

4. Intended use of the gaseous fuel:

.....

5. Quantities of gaseous fuel to be transported:

Quantities of re-gasified natural gas by gas year		The year of connection	The first year after connection	The second year after connection	The third year after connection	The fourth year after connection	The fifth year after connection
- max. annual	thousand m ³ n/year						
	thousand kWh/year						
- min. annual	thousand m ³ n/year						
	thousand kWh/year						
- max. daily	m ³ n/day						
	kWh/day						
- min. daily	m ³ n/day						
	kWh/day						
- max. hourly (m ³ n/h)							
- min. hourly (m ³ n/h)							
- contracted capacity (m ³ n/h)							*
- contracted capacity (kWh/h)							

5.1 For conversion from m³n to kWh we used a value of H_{Smax} = located on the Gas Transmission Operator GAZ-SYSTEM S.A. website for exit point gas.....

6. Information on the planned exit point(s) connection capacity up to the tenth year after connection (.....year) **:.....

7. Composition of re-gasified natural gas to be delivered to the TSO's transmission system taking into account the potential variability of the gas composition:

Composition of gaseous fuel	The year of connection	The first year after connection	The second year after connection	The third year after connection	The fourth year after connection	The fifth year after connection
Hydrogen sulphide content (mg/m ³)***	from to	from to	from to	from to	from to	from to
Oxygen content (%mol/mol)***	from to	from to	from to	from to	from to	from to
Carbon dioxide content (% mol/mol)***	from to	from to	from to	from to	from to	from to
Mercury fumes content (µg/m ³)***	from to	from to	from to	from to	from to	from to
Mercaptan sulphur content (mg/m ³)***	from to	from to	from to	from to	from to	from to
Total sulphur content (mg/m ³)***	from to	from to	from to	from to	from to	from to
Water dew point temperature for 5.5 MPa from 1 April to 30 September (°C)	from to	from to	from to	from to	from to	from to
Water dew point temperature for 5.5 MPa from 1 October to 31 March (°C)	from to	from to	from to	from to	from to	from to
Hydrocarbon dew-point temperature (°C)	from to	from to	from to	from to	from to	from to
Dust content of a particle greater than 5 µm (mg/m ³)***	from to	from to	from to			

***All values in the table except the value of temperature of water dew point shall be given for normal conditions.

8. Profile of the gaseous fuel delivery to the TSO's transmission system:

by quarter:	Q1	Q2	Q3	Q4
% of annual off-take volume				

9. Pressure of the re-gasified natural gas at the point of delivery to the TSO's transmission system:

- a) minimum MPa,
- b) maximum MPa.

10. Description of requirements related to the commissioning of the liquefied natural gas facility to be connected to the TSO's transmission system:

.....

11. Does the Entity have the licence (pre-approved licence) adequate to the business activity:

- Yes
- No

12. Other information relevant to the assessment of the connection conditions:

.....
.....
.....
.....
.....

13. Requirements concerning gas quality parameters or conditions of its transportation, if other than those set out in the Transmission Network Code.

.....
.....
.....
.....
.....

14. The following documents are attached to this Application:

- a) plot or area development plan prepared on the basis of a current base map or an individual map accepted to the national land surveying and cartographic resources, indicating the equipment, installation or networks to be connected,
- b) current extract from the register of business activity or the National Court Register (KRS) and a power of attorney confirming the right of the signatories of the Application to represent the Applicant, unless such right results from the above-mentioned documents,
- c) Informative clause

NOTE: Application form should be signed by the representative person/s in your organization in accordance with the current extract from the relevant commercial register obtained in line with the principles specified in the regulations of the country where the applicant has its registered office or by the representative person empowered by appropriate power of attorney. If the application is signed by a person with appropriate power of attorney, please attach a document confirming the granting of the PoA.

All copies of submitted documents should be certified as true to the original by a legal counsel, notary or an authorised representative of the Applicant.

.....

place	date	signature(s) and stamp(s) of the Applicant(s)
-------	------	---

* connection capacity (m³/h)
** fill in case of planned extension of the exit point
***All values in the table except the value of temperature of water drew point shall be given for normal conditions.
