**Gas Transmission Operator
GAZ-SYSTEM S.A.
02-337 Warszawa, ul. Mszczonowska 4**

APPLICATION¹

for the definition of the conditions of connection to a transmission network managed by Gas Transmission Operator GAZ-SYSTEM S.A. ("TSO") for a Group A entity being a final customer.

1. We hereby apply for the definition of the conditions of connection to the transmission network managed by the Gas Transmission Operator GAZ-SYSTEM S.A. for the gas equipment and installations of the following facility:

.....
(name, type - building, use: business, services, commercial, manufacturing, etc.)

located in:

.....
(address of the location where gaseous fuel is to be off-taken - locality, municipality, street, building no, apartment no, plot no, precinct)

.....

2. Gaseous fuel: E /Lw *
(class, sub-class and designation according to PN-C-04750:2011 ÷ PN-C-04752:2011)

3. Selected from the catalogue of system points posted on the TSO's website: www.gaz-system.pl
a) **physical entry point** to the TSO's transmission system at which gaseous fuel is to be delivered for transmission:

¹ The application shall be filled out in accordance with the instruction for completing the application, located on the Company's website at www.gaz-system.pl

b) **physical exit point** from the TSO's transmission system at which gaseous fuel is to be off-taken from the TSO's transmission system:

4. Expected starting date for the delivery of gaseous fuel:

5. Intended use of the gaseous fuel:

 (e.g. industrial production, heating, vehicles power supply)

6. Gas equipment to be connected:

equipment:	number of units:	capacity of one unit (m ³ n/h):	capacity of one unit in MW (applies to power industry customers):
.....
.....

7. Quantities of gaseous fuel to be delivered for transmission and off-taken from the TSO's transmission system:

Off-take by year:		The year of connection (...)	First year after connection (...)	Second year after connection (...)	Third year after connection (...)	Fourth year after connection (...)	Fifth year after connection (...)
- max. annual	thousand m ³ /year						
	thousand kWh/year						
- min. annual	thousand m ³ /year						
	thousand kWh/year						
- max. daily	m ³ n/day						
	kWh/day						
- min. daily	m ³ n/day						
	kWh/day						
- max. hourly (m ³ n/h)							
- min. hourly (m ³ n/h)							
- contracted capacity (m ³ n/h)							**
- contracted capacity (kwh/h)							

7.1 For conversion from m³n to kWh we used a value of H_{Smax} = located on the Gas Transmission Operator GAZ-SYSTEM S.A. website for exit point.....

7.2 Quantities of gaseous fuel delivered for transmission and off-taken from the transmission system, as referred to in section 7 of the Application, including the currently used capacity ***

- Yes
- No

8. Information on the planned connection point capacity up to the tenth year after connection (.....year) ****:

9. Profile of the gaseous fuel off-take from the TSO's transmission system:

by quarter:	Q1	Q2	Q3	Q4
% of annual off-take volume				

10. The pressure of gaseous fuel required at the physical exit point from the TSO's transmission system:

- a) minimum MPa,
- b) maximum MPa.

11. Operating conditions of the gas equipment to be connected:

- a) during commissioning and tests:
- b) during operation:

12. The minimum quantity of gaseous fuel required to maintain the operation of the gas equipment:(m³n/h)*****

13. Possibility of using alternative sources of energy in case of an interruption of the transmission of gaseous fuel:

14. Requirements concerning gas quality parameters or conditions of its transportation, if other than those set out in the Transmission Network Code.

.....

15. Information regarding the need for odorization of gaseous fuel

.....

16. Additional information relevant to the definition of the connection conditions:

16.1 Is gaseous fuel off-taken at the facility to be connected?

- YES (If YES is selected, please fill out section 17)
- NO

17. Quantities of gaseous fuel being currently off-taken at the facility to be connected:
