**Gas Transmission Operator
GAZ-SYSTEM S.A.
02-337 Warszawa, ul. Mszczonowska 4**

APPLICATION

for the definition of the conditions of connection to a transmission network managed by Gas Transmission Operator GAZ-SYSTEM S.A. ("TSO") for a Group C entity engaging in the transmission or distribution of gaseous fuels.

1. We hereby apply for the connection to the transmission network managed by the Gas Transmission Operator GAZ-SYSTEM S.A. for:

.....
(type of gas network to be connected e.g. a medium or high pressure gas pipeline)

supplying gaseous fuel to customers in the area of:

.....
(name of locality, municipality)

which we intend to use for the transmission / distribution of gaseous fuel to customers.

2. Gaseous fuel: E /Lw*
(class, sub-class and designation according to PN-C-04750:2011 ÷ PN-C-04753:2011)

3. Selected from the catalogue of system points posted on the TSO's website: www.gaz-system.pl
- a) physical entry point to the TSO's transmission system at which gaseous fuel is to be delivered for transmission:
 - b) physical exit point from the TSO's transmission system at which gaseous fuel is to be off-taken from the TSO's transmission system:

4. Expected starting date for the delivery of gaseous fuel:
5. Intended use of the gaseous fuel:.....
6. Quantities of gaseous fuel to be delivered for transmission and off-taken from the TSO's transmission system:

Off-take by year:		target level as of year
- max. annual	in thousand m ³ /year				
	in thousand kWh/year				
- min. annual	in thousand m ³ /year				
	in thousand kWh/year				
- max. daily	in m ³ n/day				
	in kWh/day				
- min. daily	in m ³ n/day				
	in kWh/day				
- max. hourly (m ³ n/h)					***
- min. hourly (m ³ n/h)					
- contracted capacity (m ³ n/h)					***

***connection capacity

- 6.1 For conversion from m³n to kWh we used a value of H_{smax} = located on the Gas Transmission Operator GAZ-SYSTEM S.A. website for gas station.....
- 6.2 Quantities of gaseous fuel delivered for transmission and off-taken from the transmission system, as referred to in section 5 of the Application, including the currently used capacity ***
- Yes
 - No

7. Profile of the gaseous fuel off-take from the TSO's transmission system:

by quarter:	Q1	Q2	Q3	Q4
% of annual off-take volume				

8. The pressure of gaseous fuel required at the physical point of delivery and off-take (exit point from the TSO's transmission system):

a) minimum MPa,

b) maximum MPa.

9. Licence for transmission / distribution of gaseous fuel (pre-approved licence):

.....
(number, issuance date, type of licensed activity, issuing authority, validity term)

10. Additional information relevant to the definition of the connection conditions:

9.1. Does the Entity currently off-take gaseous fuel for transmission or distribution at the physical exit point indicated in section 3b)?

- YES (If YES is selected, please fill out section 11a)

- NO (If NO is selected, please fill out section 11)

9.2. Other

11. Are the customers to whom the gaseous fuel is to be transmitted or distributed currently customers of gaseous fuel?

- YES (If YES is selected, please fill out section 11b)

- No

12. Quantities of gaseous fuel being currently off-taken for transmission and distribution:

a) at the physical exit point indicated in section 3b):

- annual off-take (thousand
m³n/year)

- max. hourly off-take (m³n/h)

- min. hourly off-take (m³n/h)

b) by the current customers of gaseous fuel:

- annual off-take (thousand
m³n/year)

- max. hourly off-take (m³n/h)

- min. hourly off-take (m³n/h)

13. Requirements concerning gas quality parameters or conditions of its transportation, if other than those set out in the Transmission Network Code.

.....
.....
.....

14. The following documents are attached to this Application:
- a) plot or site development plan prepared on the basis of a current base map or an individual map accepted to the national land surveying and cartographic resources, indicating the equipment, installation or networks to be connected,**
 - b) projection analysis of the quantities of gaseous fuel to be off-taken in each year, taking specifically into account the type of activity and customers (industrial customers, e.g. district heating plants, boiler plants, manufacturing plants, etc.; households), and the use of gaseous fuel (e.g. industrial production, heating, etc.),
 - c) copy of a licence or pre-approved licence held,
 - d) current extract from the register of business activity or the National Court Register (KRS) and a power of attorney confirming the right of the signatories of the Application to represent the Applicant, unless such right results from the above-mentioned documents.

NOTE: All copies of submitted documents should be certified as true to the original by a legal counsel, notary or an authorised representative of the Applicant.

.....

place	date	signature(s) of the Applicant(s)
-------	------	----------------------------------

* delete if not applicable
 ** to be submitted in case when a "new" exit point from the TSO's transmission system is indicated in section 3b)
 *** connection capacity
 **** fill out in case when an existing exit point is being upgraded
