

Transmission- key figures

Data for 2012 – as at 31 December 2012

Total length of transmission grid	10 033 km
Number of entry points	63
Number of exit points	966
Number of gas stations	887
Number of compressor stations	14
Number of transmission system nodes	58
Volume of transmitted gas fuel*	16.3* bcm
	181 TWh**
Underground gas storage capacity (UGS)***	1.8 bcm

* - the provided amount of gas transmitted also includes transmission to underground gas storage and transmission of low-methane natural gas (L) converted into high-methane natural gas (E)

* - the provided amount of gas transmitted also includes transmission to underground gas storage and transmission of low-methane natural gas (L)

** - including capacity reserved for GAZ-SYSTEM S.A.
