

# Capacity allocation

*NOTE: The current and detailed interpretation of the principles of the provision of services by GAZ-SYSTEM S.A. is contained in the applicable Transmission Network Code (TNC). The details of capacity allocation are described in point 7 of the TNC.*

GAZ-SYSTEM S.A. allocates capacity on transparent and non-discriminatory principles which apply to all transmission system users.

Type of available products:

## Type of product Period of product availability Comments

Annual	Gas year	From 06:00 1st October of the previous year to 06:00 1st October of relevant gas year.  In relevant gas year there are following quarters: From 06:00 1st October of the previous gas year to 06:00 1st January of relevant gas year.
Quarterly	Quarter	From 06:00 1st January of given gas year to 06:00 1st April of relevant gas year. From 06:00 1st April of given gas year to 06:00 1st July of relevant gas year. From 06:00 1st July of given gas year to 06:00 1st October of relevant gas year.
Monthly	Gas month	From 06:00 first day of given month to 06:00 first day of next month
One day	Gas day	From 06:00 given day to 06:00 next day
Within-day	Part of gas day	For a given hour in the gas day to the end of this gas day

Types of allocated capacity:

- on a firm basis
- reverse flow on a firm basis
- interruptible conditionally firm capacity,
- on an interrupted basis
- on a reversed basis – on an interrupted basis at specified points of the system.
- reverse flow on interruptible basis

## FIRM CAPACITY

The only condition for applying for capacity allocation is the signature of a transmission contract with GAZ-SYSTEM S.A. as a frame contract and participation in the Capacity Allocation Procedure (PP Procedure).

## Capacity allocation during the current gas year

Type of product	Deadline for applying to GAZ-SYSTEM S.A. for submitting a PP/PZ application	Effectiveness date – use of the service
Annual	No earlier than 2 months before and no later than 2 weeks before date of use of the service	From the next gas quarter
Quarterly	No earlier than 2 months before and no later than 2 weeks before date of use of the service	From the next gas month

## Capacity Allocation Procedure

*for the gas year following the gas year when the procedure of providing capacity is carried out*

Type of product	Deadline for applying to GAZ-SYSTEM S.A. with a PP/PZ	Effectiveness date - start of use of the service
-----------------	---	--

## application

Yearly

25 June – 15 July of  
Quarterly each gas year

From 1 October of the following gas year  
when the procedure of providing capacity is  
carried out

Monthly

*The following are required for participation in the CA Procedure:*

- the conclusion of a frame contract with GAZ-SYSTEM S.A.
- the submission of a capacity allocation PP application ([PP Application](#))
- the submission of Financial Security Statement.

*The capacity allocation procedure (window of time 25 June – 15 July) is also necessarily applied to half-yearly, quarterly and monthly periods, the implementation of which is to start on 1 October of the gas year following the gas year in which the capacity is allocated.*

*Every participant of the PP Procedure may submit one PP Application in a given physical point of entry or exit, in which he specifies the order for annual, half-yearly, quarterly and monthly periods.*

*The date of submission of the application for the conclusion of a transmission contract, a contract on capacity allocation (PP) or the amendment of these documents is considered the date of submission of documents to GAZ-SYSTEM S.A. which are correct in formal/legal terms. Applications submitted in the PP Procedure shall be assessed in formal/legal and technical terms.*

- By the 15th August the information for PP Procedure participants on necessity to allocate capacity among existing and new system users through a PP Agreement (if the sum of the capacity ordered at the connection with domestic gas fuel deposits, gas mixing and low-methane natural gas conversion facilities, as well as at the connection with customer installations and the distribution network of the distribution system operator, with which an inter-operator transmission contract has not been concluded, exceeds the available capacity) is provided.
- By the 20th September the information for PP Procedure participants about capacity allocation is provided.

## Capacity allocation in the overnomination procedure

Type of product	Deadline for applying to GAZ-SYSTEM S.A. with a PP/PZ application	Effectiveness date - start of use of the service
Daily		
Within-day (interrupted)	2 weeks before the date of use of the services	In accordance with approved nomination

*The capacity available under the overnomination procedure is provided under a transmission contract, capacity and transmission ability allocation (PP/PZ) and nomination confirmed by the TSO.*

## Auction Procedure

*For physical entry and exit points at interconnections with transmission systems of neighbouring countries ( $FPWE_{OSP}$  and  $FPWY_{OSP}$ ) in national transmission system*

Type of product	Deadline for applying to GAZ-SYSTEM S.A. with a PP/PZ application	Effectiveness date - start of use of the service
Yearly		
Quarterly		
Monthly	In line with <a href="#">Auctions Schedule</a>	Start of the use of service in accordance with the period of auctioning product availability. Conclusion of PP/PZ takes place electronically by providing access in IES to the capacity allocation.
Daily		

Within-day

*Capacity allocation is contracted according to the auction mechanisms described in point 7.4.12 of the TNC.*

*The right of participation in an auction organized on [GSA Platform](#) shall be limited to the Auction Participants, i.e. the System Users that fulfill all requirements described [here](#).*

#### **INTERRUPTED CAPACITY**

GAZ-SYSTEM S.A. specifies the level of the available interrupted capacity, ensuring equal treatment of all entities.

GAZ-SYSTEM S.A. provides interrupted capacity if there is no firm capacity available. The user can use the firm and interrupted capacity at one point.
