

LNG Terminal

Polskie LNG

GAZ-SYSTEM is the owner of Polskie LNG, a company established for the construction and operation of the liquefied natural gas (LNG) terminal in winouj cie that at present manages the terminal. The LNG Terminal in winouj cie was built in 2006-2016, and it is the first investment of this type in the Central and Eastern Europe and in the are of the Baltic Sea. Apart from the LNG Terminal, the following structures were built in winouj cie: a breakwater, port infrastructure for handling LNG transporting ships, and Szczecin- winouj cie connecting gas pipeline. More about President Lech Kaczy ski LNG Terminal can be found at: www.polskieng.pl.

The LNG Terminal in winouj cie:

- enables accepting gas transported by sea from any part of the world;
- paves the way for the actual diversification of the sources of gas supplies;
- increases Poland's energy security;
- permanently changes the situation on the natural gas market in Poland;
- contributes to the increase of the competitiveness of natural gas.

Schedule of works on the investment project

- January 2006 – The Cabinet passed the resolution on the preparatory activities for the investment and commercial decisions concerning the construction of the LNG Terminal;
- April 2006 – The Parliament passed the Act on the investments relating to the liquefied natural gas regasification terminal in winouj cie;
