

GAZ-SYSTEM S.A. again in the Ranking of Responsible Companies

Our company was again included in the Ranking of Responsible Companies at the 5th place among power companies and at the 30th place in the general ranking prepared by the Centre of Business Ethics of the Leon Kołmiński University and Dziennik Gazeta Prawna. This means that we have moved two places forward in the industry and one place forward in the general list.

Ranking	Ranking in 2013	Company	Responsible Leadership	Social Commitment	Communication with Stakeholders	Social Innovativeness	Responsible Management	Sum
Paliva, energetyka, wydobywanie

6	33	PGiG SA	100	48	92	90	109	439
7	35	Forum Power and Heat Polska	92	48	42	100	152	434
8	41	RWE Polska	44	56	82	46	154	364
9	47	Geofizyka Toruń SA	62	58	60	58	122	360
10	50	KGHM	42	28	82	86	105	343

"In our ranking, we have gathered the elite of companies that apply CSR principles. And it does not matter whether we mean place on the podium or at the end of the list. The very fact that a company is recorded in the list shows that it is one of top companies in the whole market", says Jarosław Chorodecki responsible for ranking preparation.

The Ranking of Responsible Companies is published every year. To the eight edition, over 500 companies were invited. The ranking was prepared on the basis of a questionnaire prepared by Dr. Bolesław Rok, expert from the Centre of Business Ethics of the Leon Kołmiński University in cooperation with the consulting company, PwC, which was responsible for the verification of the study. This-year questionnaire was made of 60 closed questions broken down into five areas: responsible leadership, social commitment, communication with stakeholders, social innovativeness, and responsible management.

Gas Transmission Operator GAZ-SYSTEM S.A. is a strategic company for the Polish economy, responsible for the transmission of natural gas and the management of the most important gas pipelines in Poland. GAZ-SYSTEM S.A. is also the owner of Polskie LNG S.A., a company established to build the winouj cie LNG terminal.

As part of its 2015-2025 investment scheme, GAZ-SYSTEM S.A. is planning to build over 2,000 km of new gas lines in western, southern and eastern Poland. Further expansion of the domestic transmission system, including construction of new gas pipelines being part of the North-South Gas Corridor, as well as construction of interconnections with Lithuania, Slovakia and the Czech Republic, will enhance Poland's energy security and contribute considerably to the development of the European transmission system.

In 2009-2015, GAZ-SYSTEM S.A. completed an investment plan consisting in the construction of over 1,200 km of new gas transmission lines in north-western and central Poland. The projects implemented by the company and the physical and virtual reversal on the Yamal pipeline have translated into a significant increase in technical import opportunities on routes other than from the East.
