

Transmission- key figures

Data for 2011 – as at 31 December 2011

Total length of transmission grid	9 853 km
Number of entry points	61
Number of exit points	967
Number of gas stations	869
Number of compressor stations	14
Number of transmission system nodes	57
Volume of transmitted gas fuel*	15.6 bcm
Underground gas storage capacity (UGS)**	1.6 bcm

* - the provided amount of gas transmitted also includes transmission to underground gas storage and transmission of low-methane natural gas (L) converted into high-methane natural gas (E)

** - including capacity reserved for GAZ-SYSTEM S.A.
