

Mission and Vision

Company mission:

We ensure safe and secure transport of natural gas in Poland and actively develop an integrated transmission system in Europe.

In our day-to-day activities, we care for the environment and are guided by the principles of sustainable development.

Company vision:

To ensure energy security and be a major integrator of the transmission system in Europe by:

- Establishing conditions for the development of a competitive gas market in Poland and companies from the sector,
- Developing gas interconnectors with the neighbouring countries as part of the European gas network,
- Establishing a modern gas network in Poland and providing state-of-the-art services to ensure that the network is optimally used.
