

Polskie LNG

GAZ-SYSTEM S.A. owns the company Polskie LNG S.A., set up to build and operate the liquefied natural gas (LNG) terminal at Winoujcie.

The LNG terminal will diversify natural-gas supply sources, which translates into improved national energy security.

On 19 August 2008, the Council of Ministers has adopted a resolution which recognises the LNG terminal as an investment of strategic importance for Poland's national interests, consistent with the plans for diversification of natural-gas sources and supply routes, and ensuring energy security.

GAZ-SYSTEM S.A. is the coordinator of the LNG terminal construction.

More information about the LNG terminal – see www.polskieng.pl
