

# Additional capacity allocation procedure in Lasów entry point

Between 15 June and 18 July 2011 GAZ-SYSTEM S.A. held a market screening procedure with respect to offering additional capacity at the Lasów entry point and the Market Screening Procedure for further capacity upgrade at the Lasów entry point. In the course of consultations with the Energy Regulatory Office the period covered by the "Procedure for offering additional capacity at the Lasów entry point" was shortened to 2014, and the capacity offered in 2014 was reduced by 10%, i.e. 46,800 m<sup>3</sup>/h. The remaining capacity for the years 2014 and 2015 will be offered at a later date. The above arrangements do not affect in any way the provisions of the Market Screening Procedure as regards further capacity upgrade at the Lasów entry point. The procedure concerns the period 2016-2025 (it being assumed that further capacity upgrade at the Lasów point could take place as of 2016 at the soonest, as it requires investment decisions both on the Polish and German side). The results of the procedure were reviewed by GAZ-SYSTEM S.A. and lead to signing agreements for capacity to be made available at the Lasów entry point.
