

Innovative projects

In December 2014, Gas Transmission System GAZ-SYSTEM S.A. joined the Scientific Consortium for the HESTOR Project on "The Energy storage in the form of hydrogen in salt caverns", as an industrial partner.

The Consortium is led by LOTOS Group and the Consortium Partners include: AGH University of Science and Technology in Krakow, Centre for Research and Development of Chemical Raw Materials Mining CHEMKOP Sp. z o.o., Silesian University of Technology and Warsaw University of Technology.

On July 2nd 2015 the National Centre for Research and Development has signed the grant agreement No. GEKON/02/214140/23/2015, to allow the execution and financing of the HESTOR Project.

The Project is planned to be completed within 24 months.
