

National gas transmission system

The important infrastructural investment of GAZ-SYSTEM S.A. in the domestic transmission system will be established in western, southern and eastern parts of Poland. It will include the following connections:

- Lwówek-Odolanów
- Czeszów-Kielczów
- Czeszów-Wierzchowice
- Zdzeszowice-Wrocław
- Hermanowice-Strachocina
- Strachocina -Pogórska Wola
- Pogórska Wola-Tworze
- Tworze -Tworóg
- Tworóg-K dzierzyn Ko 1e
- Rembelszczyzna-Mory-Wola Karczewska

GAZ-SYSTEM S.A. plans to build more than approx. 2000 km of new pipelines in western, southern and eastern parts of Poland in 2015-2025. Further expansion of the national transmission network and creation of new pipelines as part of the North-South Gas Corridor as well as the construction of inter-system connections with Lithuania, Slovakia and Czech Republic will make a great contribution into the development of the European transmission system.

Domestic investments also planned to be co-financed with European funds.
