

17.12.2014

An environmental decision has been issued for the Czeszów – Wierzchowice and Czeszów – Kielczów gas pipelines

The Regional Environmental Protection Director in Wrocław issued an environmental decision on 28/11/2014 for the project “Construction of a high pressure DN1000 MOP 8.4 MPa gas pipeline on the sections from ZZU Czeszów to ZZU Wierzchowice and from ZZU Czeszów to the Kielczów node within the framework of the construction of the border of the Republic of Poland (Lasów) – Taczalin – Radakowice – Gałów – Wierzchowice gas pipeline, together with the necessary supporting infrastructure in the Dolnośląskie Voivodship.”

Interested parties may read the content of the decision and the documentation collected in the course of the administrative proceedings, which have been laid out for review at the registered office of the Regional Environmental Protection Directorate in Wrocław at pl. Powstańców Warszawy 1, in room 3245, from Monday to Friday in the hours of 8 a.m. – 3 p.m.

We encourage you to read the details of [the notice](#) of the Regional Environmental Protection Director in Wrocław.

Detailed information on the [Czeszów – Wierzchowice](#) and [Czeszów – Kielczów](#) gas pipelines are in project tabs.

GAZ-SYSTEM is a strategic company for the Polish economy. It is responsible for the transmission of natural gas, manages the most important gas pipelines in Poland and owns the President Lech Kaczyński LNG Terminal in Świnoujście.

As part of the 2015-2025 investment programme, GAZ-SYSTEM is constructing over 2000 km of new gas pipelines in the western, southern and eastern parts of Poland. Over a dozen new gas pipelines are under construction within the North-South Gas Corridor and the compressor station in Kędzierzyn Koźle, as well as interconnections with Lithuania and Slovakia. Onshore gas pipelines are planned to connect the planned FSRU floating terminal in the Gulf of Gdansk with the national transmission system. The LNG Terminal in Świnoujście is also being extended, as a result of which the regasification capacity of this facility will be increased by more than a half.

The company is also implementing one of the most important infrastructural projects in the country - the Baltic Pipe project which consists in the construction of a two-way offshore gas pipeline connecting Poland and Denmark, expansion of the local transmission network and three gas compressor stations.
