GAZ-SYSTEM and NET4GAS are launching a public consultation on the incremental capacity project on the border between Poland and the Czech republic

In accordance with Chapter V, Article 27 Commission Regulation (EU) 2017/459 of 16 March 2017 establishing a network code on capacity allocation mechanisms GAZ-SYSTEM in cooperation with NET4GAS launches public consultations for incremental capacity project on the border between Poland and the Czech Republic.

The incremental capacity project proposal was prepared by the TSOs during the design phase started on 21 October 2019 in response to non-binding demand indications received from the market during [the process of Market Demand Assessment conducted from 1 July until 26 August 2019](#).

The document includes among others: a description of the incremental capacity project, including a proposed technical solution, estimated costs, timelines, offer level for bundled capacity product and terms and conditions of participation and access to incremental capacity during the yearly capacity auction in July 2021.

Interested system users are asked to send comments on the draft project proposal of the incremental capacity project on the border between Poland and the Czech Republic and the accompanying general terms and conditions for participating in the incremental capacity auction, to the e-mail address incremental@gaz-system.pl until **13 February 2020**.

GAZ-SYSTEM plays a strategic role in the Polish economy. We are responsible for natural gas transmission and operate the most important gas pipelines in Poland. As part of the 2015-2025 investment programme, GAZ-SYSTEM plans to build over 2000 km of new gas pipelines in western, southern and eastern parts of Poland. Further development of the national transmission network, including the construction of new gas pipelines making part of the North-South Gas Corridor, as well as the construction of interconnections with the neighbouring countries, will strengthen Poland's energy security and make an important contribution to the development of the European transmission system.

The Company is implementing one of the most important infrastructural projects in Poland – the Baltic Pipe project, which consists in the construction of a bidirectional offshore gas pipeline connecting Poland and Denmark and the expansion of the local transmission network.

GAZ-SYSTEM also owns Polskie LNG, the operator of the President Lech Kaczyński's LNG Terminal in Świnoujście.
