

## WELCOME TO THE SERIES OF "GAZ-SYSTEM FOR CUSTOMERS - PRACTICAL WEBINARS" WORKSHOPS

**In April, the Company is commencing a series of practical on-line workshops for customers who use GAZ-SYSTEM services or would be interested in them in the future. The list of topics covered will include such issues as: connection to the GAZ-SYSTEM transmission network (on-line applications), principles of technological start-up, tariff, annual and incremental capacity auctions and the incremental procedure.**

The first webinar "TNC in practice" on the issues important to customers included in the latest Transmission Network Code of the national transmission system will be held on April 15, 2021.

The meetings will include a presentation of selected issues concerning the principles of using the infrastructure of a transmission system operator and the terms and conditions of cooperation, as well as an opportunity to ask questions and hold discussions with GAZ-SYSTEM's employees.

In addition to the theoretical part, webinar participants will have an opportunity to learn about the practical side of functionalities of GAZ-SYSTEM's IT systems used for customer services. One of the webinars is also scheduled to include training on how to manage user accounts within your own Organization (for Intra-Organization Administrators in the Information Sharing System (SWI) and Organization Administrators on the GSA Platform). There will also be a webinar on the Gas Inside Information Platform (GIIP) for publishing of the internal REMIT information prepared in accordance with ACER guidelines.

The schedule of all webinars planned for the coming weeks is published on the company's website at [Customer zone](#). Prior to each webinar, a form will be activated to register participants for the upcoming event. Prior to the webinar date, registered participants will receive a link to the online meeting.

Webinars will be conducted in Polish. In the event that customers inform us about the need to conduct webinars in English, they will be organized at a later date. Applications for this should be sent to: [rynek@gaz-system.pl](mailto:rynek@gaz-system.pl)

We invite you to register for the first "TNC in practice" webinar: [LINK TO THE FORM](#).

*GAZ-SYSTEM is a strategic company for the Polish economy. It is responsible for the transmission of natural gas, manages the most important gas pipelines in Poland and owns the President Lech Kaczyński LNG Terminal in Winoujcie.*

*As part of the 2015-2025 investment programme, GAZ-SYSTEM is constructing over 2000 km of new gas pipelines in the western, southern and eastern parts of Poland. Over a dozen new gas pipelines are under construction within the North-South Gas Corridor and the compressor station in Kędzierzyn Koźle, as well as interconnections with Lithuania and Slovakia. Onshore gas pipelines are planned to connect the planned FSRU floating terminal in the Gulf of Gdansk with the national transmission system. The LNG Terminal in Winoujcie is also being extended, as a result of which the regasification capacity of this facility will be increased by more than a half.*

*The company is also implementing one of the most important infrastructural projects in the country - the Baltic Pipe project which consists in the construction of a two-way offshore gas pipeline connecting Poland and Denmark, expansion of the local transmission network and three gas compressor stations.*
