Global Compact Initiative: Communication on Progress

In July last year, GAZ-SYSTEM S.A. joined the Global Compact initiative. Thus we declared our respect for the ten principles on human rights, labour relations, environmental protection and anti-corruption.

One year into our accession to this global initiative, we would like to present our first Communication on Progress in implementing the Global Compact policy. We hope that the measures described in this document have demonstrated our determination to conduct responsible business policies which take into account the needs of our employees, customers and other stakeholders, and also respect the environment.

Global Compact is a UN Secretary General Kofi Annan's initiative which calls the business to be guided in its activities by ten fundamental principles of human rights, labour rights, environmental protection and anti-corruption. Global Compact promotes Corporate Social Responsibility - CSR. For more information, visit: www.globalcompact.org.pl
